

22 February 1963

MEMORANDUM FOR THE DIRECTOR

1. I have been singularly impressed over the past months at the calm, unruffled, quietly analytical, and remarkably astute manner in which Bud Wheelon approaches all problems. Even in areas not of his responsibility but of which he is knowledgeable, he has been of remarkable help to me in a totally unobtrusive and completely objective manner. He is one of our finest assets, and I am fearful he may be a dwindling one because of certain factors of utilization and community presence beyond his control.

2. I would urge you, therefore, to bring him into the family circle at every opportunity and to utilize him as a source of basic judgment recommendations in areas which trouble you.
